Technologies/Framework: React.js, React Native, Redux, Bootstrap, Tailwind, Node.js, HTML, CSS, Express.js, Git & GitHub, Postman

Experience

Capgemini Technology Services India Limited

Oct 2021 – Present

Software Engineer

Kolkata, West Bengal

- Collaborating on the Bio Clinical **Syndication project**, using React.js to address dark mode theme bugs and enhance user experience.
- Assisting in the development of consent acquisition features for subjects, ensuring regulatory compliance and maintaining workflow integrity across different modalities.
- Contributed to the UI development for a React Native mobile app at **CDH Home Solutions**, collaborating with a team to craft seamless customer lifecycle experiences, including secure authentication and intuitive user interfaces..
- Leveraged Material UI and Google Maps API integration to enhance user engagement and satisfaction, ensuring efficient tracking of user activity and delivering tailored solutions for improved user experiences.
- Worked on the development of the **Wealth and Personal Banking project**, leveraging React.js, HTML5, CSS3, and JavaScript to build responsive and scalable user interfaces, while ensuring seamless state management with Redux for efficient data flow.
- Collaborated closely with UX/UI designers to translate design mock-ups into functional UI components, ensuring cross-browser compatibility and adherence to accessibility standards, while implementing automated testing using Jest and Enzyme to maintain code quality and enhance user experience. Managed version control using Git and GitHub for seamless collaboration and code versioning.

Byju's Think and Learn

July 2021 – Aug 2021
